MERIDEN COMPLIANCE

Five Rules for AI at the Shore Desk

Keep this where your team works. Apply alongside approved company procedures.

1. Use approved tools for approved work.
Check that the task and tool are permitted before you start.

2. Protect the information you put in.
Use only the data allowed for that tool and task. Submit no more than necessary.

3. Check before you rely.
Verify important facts, figures and references against authoritative sources.

4. Keep people in control.
AI does not replace the person authorised to decide, review or approve.

5. Stop and report concerns.
Pause reliance on questionable output and notify the responsible person promptly.
